

Finance Committee

City Hall, Council Chambers 116 First Street, Neptune Beach, Florida 32266 Wednesday, February 24, 2021, 10:00 AM

Agenda

1. <u>Call to Order</u>

2. Old Business

- a. Status Update of Jarboe Park Costs p. 2
- b. Status Update on Completion of Senior Center p. 4

3. New Business

- a. Department CIP Status
 - 1. Public Safety p. 34
 - 2. Community Development p. 40
 - 3. Mobility Management p. 44
 - 4. Public Works p. 45
- 4. Future Business
 - a. Council Roundtable Discussion on Goals and Strategies
 - b. FY22 Budget Process Recommendation
- 5. Public Comments
- 6. Adjournment

*Council Members in attendance at the Committee Meeting may include:

Chair: Councilor Lauren Key

Mayor Elaine Brown Vice Mayor Fred Jones Councilor Kerry Chin Councilor Josh Messinger

Please register for Finance Committee Meeting on Feb 24, 2021 10:00 AM EST at:

https://attendee.gotowebinar.com/register/3753076701710981392

After registering, you will receive a confirmation email containing information about joining the webinar.

SENIOR CENTER

Senior Activity Center Staff Recommendation 16 February 2021

Stefen Wynn, *M.P.A. City Manager*

Recommendation for Completing the Senior Center:

The modular building is onsite, and the main structure is nearing final completion. Even though the building is situated at: 2004 Forest Avenue, there are many items that need to be completed. After sending an email to staff on: 2/6/2021 (**See Attachment A**), and receiving input from various departments, I've put together the following recommendation:

To ensure that the Senior Activity Center Building complies with all relevant sections of the City's Code (See Attachment B), including appropriate buffering as required per the City's Code (See Attachment C), and to ensure that the final product complies with ADA guidelines and the requirements of the SJRWMD for storm water treatment from the parking lot, <u>it is my recommendation that the final completion for</u> the senior center be completed as a Design-Build proposal with a maximum not-to-exceed price.

Funding for the final completion of the Senior Center should come from the donations collected throughout the capital campaign that ended late last year. A total collection of donations resulted in \$170,804.24 (**See Attachment D**) gathered for the Senior Activity Center.

Items to be included in a proposed Design-Build RFP:

- **Design** (Architectural and Engineering) for Improvements:
 - o Porch
 - Parking Lot
 - o Storm Water
 - Landscaping
 - HVAC moving or screening
 - o Buffering Requirements as required by Code
- Permitting with SJRWMD
 - o Permitting with other relevant agencies as needed
- Construction of:
 - o Porch
 - Landscaping/buffering/screening/curbing
 - o Electrical
 - Fine Grading
 - o Ingress/Egress and ADA considerations (sidewalks from each ramp)
 - Parking Lot Space Requirements (14 spaces and 1 van accessible space for a total of 15 required spaces)

Proposed Timeline to Completion:

- March 3, 2021 CONB BID NO. 2021-02 Senior Center Finish Design-Build published
- March 31, 2021 CONB Bid NO. 2021-02 deadline at 2PM
- April 5, 2021 Recommendation for Council Consideration on Design-Build Firm
- May 6, 2021 90% complete plans expected from selected firm & relevant permits have been received
- May 20, 2021 Contractor's Expected First Day
- July 26, 2021 Project Substantially Complete
- August 26, 2021 Project Completed

٠

After the construction/installation of the senior center is completed and monies reimbursed to the Better JAX Fund, Leslie has items that she'd like to purchase (**See Attachment E**). These will most likely be budgeted in upcoming fiscal years, but may also be obtained through cash and in-kind donations.

Team –

The Senior Center project is one that I've neglected since the beginning of the year. The City's capital campaign was wildly successful, thanks to Leslie's phenomenal fundraising efforts. Over the last few days, I've received many concerns related to the final placement, color, and finish work related to the Senior Center. While we all know that it isn't done, we've still received concerns from residents that must be addressed. I also need your help to get on board with making this project successful. Over the last few days, I've heard your concerns about the Senior Center as well, thank you for bringing them to my attention. Now, I need your assistance in finding solutions for those concerns.

Following this email, you'll get a calendar invite for a meeting to discuss the details of finishing the Senior Center, please plan on being available Tuesday, 2/9/2021 at 9AM. I'd like: Leslie, Carl, Catherine, and Kristina to join me in the City Hall conference room and: Colin, Jim, Piper, Megan S., Chief and Miklos to join through the GoToMeeting link found in the follow-up calendar invite. I'm going to need your help to fine-tune and implement a plan ensuring the Senior Center is a beautiful event space for the entire community that we serve.

Some good news: we've got time. We have time to develop and implement a plan over the next few months since the building itself will be unusable to seniors due to the effects of COVID-19. I understand that each of you are equally busy getting other projects out of the ground, normal routine tasks, and preparing for annual events, but I'm going to need your help to come up with a solid plan for this project.

Below is a list of tasks that we'll need to consider during the meeting.

<u>Leslie</u>

You'll need to give information about the size of the lot and include any buffering requirements that the City's code may have between residential and commercial properties. Please make sure that all potential companies receive the same information via email, it may be worthwhile to have potential bidders come out to the site ahead of time to see it firsthand. Please consider having the request to bidders by due by February 10th, and responses due to us by February 17th, 2021.

- <u>Three Quotes from Landscape Architects</u>:
 - Quote Cost to Design and produce color renderings within an expedited timeframe

- Alternative to Quote Cost to Design, Procure, and Install all Landscaping Elements

 - Skyline Construction <u>https://skylineconstruction-inc.com/ground-up-</u> construction-gallery/

<u>Carl</u>

I'll need your assistance to show how much of the Capital Improvement Plan has been committed based on existing and open contracts, and how much is left. I'll also need to know the balance of donations received and how much is available for use. All of the information that you provide will help to get a budget put together for completion of the Senior Center. Capital Improvement Plan Budget Status

- How much is available to design, install and construct the following:
 - Design of parking lot and landscaping
 - Landscaping, trees, bushes, mulching, flowers, and plants
 - Parking Lot, curbing, asphalt or stone, sidewalk
 - Front Porch, roof, ramps, and pathways
 - Curbing
 - Wall Extension
 - Moving Air Conditioners to the other side of the building
 - Electrical System upgrades including the possibility of a transformer

<u>Colin</u>

I sent over a grant opportunity that has a relatively quick turnaround required. Gov. DeSantis announced an opportunity to apply for Community Development Block Grant – Coronavirus (CDBG-CV) Relief. This might be something that we can apply to in order to upgrade the air filtration and HVAC at the Senior Center. I know that most CDBG activities have an LMMI component to them, but the Senior Center caters to people that most likely have fixed-incomes and are qualify under the L/M Income Limited Clientele test. Reference: CDBG Guide National Objectives Eligible Activities, 3-14 L/M Income Limited Clientele. I think that the Senior Center is a prime-candidate for the new opportunity.

- Contact with the CDBG Entitlement Community Director in Jacksonville
- Assist in putting together an application for funding with the following improvements:
 - HVAC relocation with improvements to air quality system to help stop the spread of viruses
 - Installing a new Central Air System with: HEPA fan/filter systems & Ultraviolet Germicidal irradiation (UVGI)
 - <u>https://www.cdc.gov/coronavirus/2019-</u> ncov/community/ventilation.html
 - Improvements to the entrance and exits of the building to accommodate ADA accessibility, including parking lot accommodations and design

<u>Jim</u>

I'll need you to review any designs and details that come in from engineers, architects. I'll also need your help in coordinating staff from Public Works to accomplish the work that we can do in-house such as porch construction, planting of trees and relevant plumbing items to help connect the building.

- Please get together a list of criteria that the SJRWMD will consider prior to issuing a permit for a parking lots.
- Please review my list of items to be quoted from architects and engineers and let me know what else needs to be included

As for timing. I'll undoubtedly be asked about the Senior Center at the 2/16/2021 Workshop. I plan on providing Council with a schedule to completion, similar to that of the Park. The good news is that I certainly don't expect the Senior Center to be completed by next week, we've got time. Generally, I'm looking to have everything completed by May, which means that there will be two projects moving simultaneously.

<u>Miklos</u>

I'll need you to consider the cost of installing a security and video monitoring system in the new senior center as well as getting telecommunications/internet to it.

<u>Kristina</u>

Please get together a list of items that the code requires between commercial buildings and residential neighborhoods. Are there buffering/screening requirements? Is there a minimum number of ADA spaces needed? Is there a minimum number of parking spaces required? Please let me know what codes we need to follow.

<u>Piper</u>

I'll need your help to coordinate permits for various activities: Electrical, Plumbing connection (PW to connect), HVAC improvements and relocation, landscaping, parking lot and curbing construction, porch construction, coordination with SJRWMD for permitting (with assistance from Jim).

Megan S.

Given your ability to manage a project, I'd like you to assist me and Leslie in putting this information together in a nice package to deliver to the Council as well as Residents.

In Public Service,

Stefen Wynn, *M.P.A.* Neptune Beach City Manager Phone: (904) 270-2400; ext. 32

Mobile: (904) 302-8097 Fax: (904) 270-2526 Email: CM@nbfl.us

116 1st St. Neptune Beach, FL. 32266

www.ci.neptune-beach.fl.us

Please get together a list of items that the code requires between commercial buildings and residential neighborhoods. Are there buffering/screening requirements? Is there a minimum number of ADA spaces needed? Is there a minimum number of parking spaces required? Please let me know what codes we need to follow.

Sec. 27-459. - Landscape buffers.

(a)Landscape buffers shall be established and maintained in accordance with this section. These requirements are illustrated in Figure 27-457-1. [See Figures at the end of article IX.] (b)One (1) or more of the following provisions may be applicable to a specific use. In such case, the most stringent requirement shall apply.

(c)Landscaped buffers shall be deemed the minimum necessary to achieve compatibility between land uses. Vehicular use areas and retention ponds may not be located within buffers.

(1) Landscape buffers along rights-of-way.

a. A landscaped area of minimum nine (9) feet in width shall be located between offstreet parking areas and abutting rights-of-way. This area shall include one (1) shade tree for every fifty (50) linear feet of frontage. In addition, a hedge of at least two (2) feet in height upon planting shall be located along the parking lot side of this buffer. This width shall be reduced to five (5) feet in the central business district (CBD).

b. A masonry wall may be substituted for the required hedge, provided it does not exceed four (4) feet in height. One (1) shrub for every four (4) linear feet of barrier shall be planted abutting these masonry walls, and may be clustered rather than evenly spaced. The remainder of the required buffer shall be landscaped with turf, shrubs or groundcover.

c. Minimum length. Landscape buffers shall extend along the entire length of the property boundary abutting the right-of-way, and may only be altered for the following purposes:

1. Construction of accessways as necessary and in compliance with an approved development plan.

2. Installation of stormwater, drainage or utility improvements as necessary and in compliance with an approved development plan.

3. Grading for retention as necessary and in compliance with an approved development plan.

4. Selective clearing for visibility of freestanding signs.

5. The regular pruning of trees to provide clear trunk and visibility between three (3) feet and fifteen (15) feet above grade. Such pruning shall only be permitted for trees with height and maturity necessary to reasonably accommodate such activity.

6. The regular removal of dead materials and debris.

7. Installation of additional landscape materials required by this Code.
 (2) Landscape buffers adjacent to residential uses.

a. A buffer shall be required for any uses other than single-family that abut single-family uses or properties. The buffer shall be minimum ten (10) feet in width, and shall contain an opaque screen composed of either plant materials, or a combination of plant materials and masonry walls. Required buffers shall have a minimum height of six (6) feet.

b. Landscape materials shall include a visual screen of shrubs that will attain a height of six (6) feet, with seventy-five (75) percent opacity, within twenty-four (24) months of planting. One (1) shade tree per twenty-five (25) linear feet shall be planted within the buffer, or a combination of one (1) shade tree and two (2) understory trees per fifty (50) linear feet.

c. A six-foot masonry wall may be substituted for the shrub screen. In this case, one (1) shade tree per twenty-five (25) linear feet shall be planted within the buffer.

d. The remainder of the required buffer shall be landscaped with turf, groundcover or shrubs. (Ord. No. 2004-10, § 1, 10-4-04)

Parking/Loading Design Standards and Buffering

• Sec. 27-548. - Design standards for off-street parking and loading areas.

(a) *Location*. The location of required off-street parking and loading areas shall conform to the following criteria:

(1) All required off-street parking spaces and the use they are intended to serve shall be located on the same parcel; provided, however, that the city council, as a special exception, with a recommendation by the community development board, may allow the establishment of offsite or remote off-street parking facilities, provided that all of the following conditions are met:

a. Practical difficulties prevent the placement of the required parking spaces on the same lot as the premises they are intended to serve.

b. The off-site parking spaces are located within four hundred (400) feet of the premises they are intended to serve.

c. The off-site parking spaces are located within the same zoning district classification as the premises which the parking spaces will serve or a classification allowing business or commercial activities.

d. The off-site parking spaces are not located in any residential district.

e. The location of the off-site parking spaces will adequately serve the use for which it is intended.

f. The location of the off-site parking spaces will not create unreasonable:

- 1. Hazards to pedestrians.
- 2. Hazards to vehicular traffic.
- 3. Traffic congestion.
- 4. Interference with access to other parking spaces in the vicinity.
- 5. Detriment to any nearby use.

g. The developer supplies a written agreement, approved in form by the city attorney, assuring the continued availability of the off-site parking facilities for the use they are intended to serve.

(2) All parking spaces required by this Code for residential uses should be located no further than the following distances from the units they serve:

a. Resident parking:200 feet

b. Visitor parking:250 feet

Distances shall be measured from a dwelling unit's entry to the parking space. Where a stairway or elevator provides access to dwelling units, the stairway or elevator shall be considered to be the entrance to the dwelling unit. For purposes of measuring these distances, each required parking space shall be assigned to a specific unit on the development plan, whether or not the developer will actually assign spaces for the exclusive use of the specific unit.

(3) Each off-street parking space shall be directly accessible from a street or alley without crossing or entering any other required off-street parking or loading space, except as provided for in tandem parking.

(4) Each off-street loading space shall be directly accessible from a street or alley without crossing or entering any other required off-street parking or loading space.

(5) Each loading space shall be accessible from the interior of the building it serves and shall be arranged for convenient and safe ingress and egress.

2

(b) Size. The size of required off-street parking and loading areas shall conform to the following criteria:
(1) Standard parking spaces shall consist of a minimum width of ten (10) feet and a length of twenty (20) feet, with wheel stops at eighteen (18) feet or with curbing at eighteen (18) feet with two-foot overhang as depicted in Figure 27-548-1. [See Figures at the end of article XIII.]
(2) A standard motorcycle parking space shall be four and one-quarter (4.25) feet wide and nine and one-quarter (9.25) feet long.

(3) Spaces for handicapped parking shall be the size specified in F.S. § 316.1955.

(4) The standard off-street loading space shall be ten (10) feet wide, twenty-five (25) feet long, provide vertical clearance of fifteen (15) feet, and provide adequate area for maneuvering, ingress and egress. The length of one (1) or more of the loading spaces may be increased up to fifty-five (55) feet if full-length tractor-trailers must be accommodated. Developers may install spaces that are larger than the standard, but the number of spaces shall not be reduced on that account.

(5) Parallel parking spaces shall be a minimum of eight (8) feet wide and twenty-two (22) feet long. If a parallel space abuts no more than one (1) other parallel space, and adequate access room is available, then the length may be reduced to twenty (20) feet.

(6) Compact car parking spaces shall be a minimum of eight (8) feet wide and sixteen (16) feet long. A maximum of twenty (20) percent of the calculated required parking spaces may be compact. If any parking spaces required are deferred, for example, the provision of compact spaces shall be prorated based on the entire parking requirement.

(7) The community development board may modify these requirements where necessary to promote a substantial public interest relating to environmental protection, heritage conservation, aesthetics, tree protection, or drainage. Under no circumstance, shall the modification create a serious hazard or inconvenience. The modification shall be based on a written statement of the public interest served by allowing the modification.

(c) *Layout.* The layout of required off-street parking and loading areas shall conform to the following criteria:

(1) Pedestrian circulation facilities, roadways, driveways, and off-street parking and loading areas shall be designed to be safe and convenient as shown in Figure 27-548-2. [See Figures at the end of article XIII.]

(2) Parking and loading areas, aisles, pedestrian walks, landscaping, and open space shall be designed as integral parts of an overall development plan and shall be properly related to existing and proposed buildings within the site and any adjacent developed sites.

(3) Buildings, parking and loading areas, landscaping and open spaces shall be designed so that pedestrians moving from parking areas to buildings and between buildings are not unreasonably exposed to vehicular traffic.

(4) Landscaped, paved, and gradually inclined or flat pedestrian walks shall be provided along the lines of the most intense use, particularly from building entrances to streets, parking areas, and adjacent buildings. Pedestrian walks should be designed to discourage incursions into landscaped areas except at designated crossings.

(5) Except for single-family and two-family residences, each off-street parking space shall open directly onto an aisle or driveway that is not a public street.

(6) Aisles and driveways shall not be used for parking vehicles, except that the driveway of a single-family or two-family residence shall be counted as a parking space for the dwelling unit, or as a number of parking spaces as determined by the city manager or designee based on the size and accessibility of the driveway.

(7) The design shall be based on a definite and logical system of drive lanes to serve the parking and loading spaces. A physical separation or barrier, such as vertical curbs, may be required to separate parking spaces from travel lanes.

(8) Parking spaces for all uses except single-family and two-family residences, shall be designed to permit entry and exit without moving any other motor vehicle.

(9) No parking space shall be located so as to block access by emergency vehicles.
(d) Surface requirements for four (4) or more commercial parking spaces. Where a use requires space for four (4) or more motor vehicles, pavement for paved off-street parking or paved off-street loading facilities shall, as a minimum requirement, consist of the minimum state department of transportation requirements, as amended. A substitute surface of an equal or greater strength may be used upon written approval of the city manager or designee, keeping in mind that the city council specifically finds that porous paving materials and unpaved parking areas should be allowed whenever possible. This is also intended to encourage creative combinations of pervious and impervious surface materials when designing a parking facility.

(e) *Surface requirements for three (3) or less parking spaces.* Where a commercial use requires space for three (3) or less motor vehicles, or any residential use, the off-street parking and loading areas shall be maintained in an even and usable condition. Pavement that minimizes impervious surface area, such as dry-laid pavers and/or gravel is encouraged. Loose surfaces, such as gravel shall be contained at all edges with curbing or other border.

(f) *Barriers, buffers and hedges.* Where off-street parking or loading areas for five (5) or more vehicles are located on the perimeter of a lot, barriers shall be provided to ensure that no portion of a parked vehicle shall encroach over and onto any adjacent private property in separate ownership or over and onto any public street or sidewalks; and further, barriers shall be provided so that no parked motor vehicle door, when open, can make such encroachment. The separation from walkways, sidewalks, streets or alleys may be a masonry wall, fence, curbing, bollards, landscaping or other approved protective device. Such protective device shall not impair the visibility of pedestrians or vehicles at entrances and exits.

(g) *Identification*. Required off-street parking and loading areas shall be identified as to purpose and location when not clearly evidenced.

(h) Drainage. All off-street parking and loading areas shall be drained so as not to cause any nuisance of adjacent property, and to prevent damage to the public right-of-way and the adjacent environment.
(i) Lighting. Adequate lighting shall be provided if off-street parking or loading is to be used at night. Such lighting shall be provided to insure user safety and security. The lighting shall be designed and installed so as to prevent glare or excessive light on adjacent property and streets. No source of illumination shall be directed into the windows of any residential building.

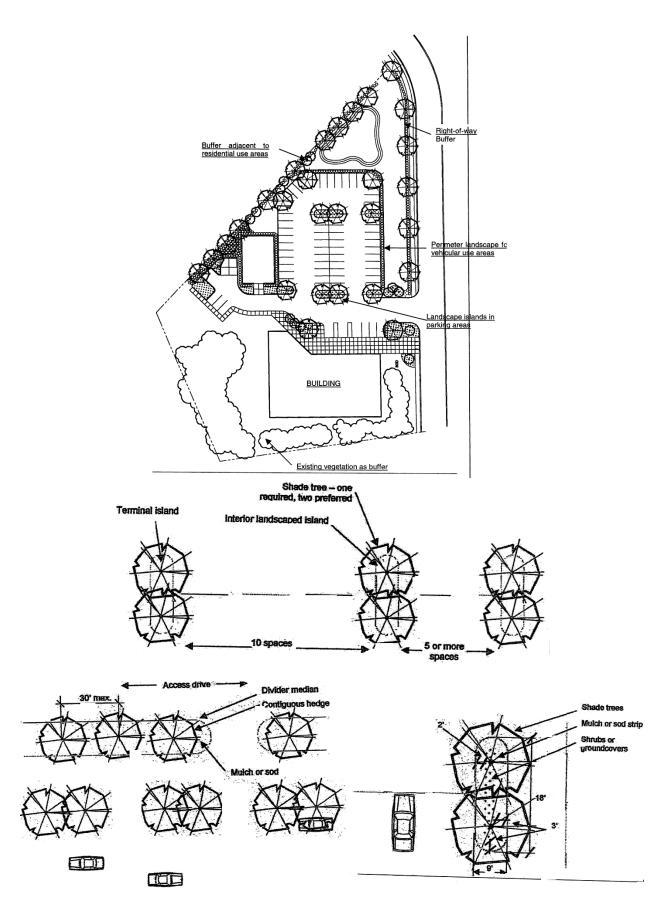

(j) *Buffers.* Where a parking lot, or portion thereof, adjoins any residential district, a six-foot visual barrier not less than eighty-five (85) percent solid, shall be erected along the edge of the parking lot, or portion thereof. Said buffers shall be maintained in good condition, and may be a structural or vegetative buffer.

(k) *Landscaping.* Landscaping requirements for parking facilities shall be as required by article IX. (I) *Entrances and exits.* The location and design of entrances and exits shall be in accordance with proper access management techniques. The number of curb cuts shall be the minimum required to allow free and safe use of the facility without impairing traffic flow along the street. The use of shared or common curb cuts is encouraged where practical as depicted in Figure 27-548-2. [See Figures at the end of article XIII.] Trees and appropriate landscaping may be used to define entrances and exits. Landscaping, curbing or other protective devices may be provided to control access and to separate pedestrian and vehicular traffic. (m) *Interior drive aisles and maneuverability.* The minimum width of interior driving aisles and maneuverability space within parking facilities shall be related to the angle of the parking spaces and the use of one-way or two-way traffic as follows:

| Parking Angle | One-way Traffic/ Maneuverability | Two-way Traffic/ Maneuverability |
|---------------|--|--|
| 0 (Parallel) | 13 feet | 24 feet |
| 30 | 13 feet | 18 feet |
| 45 | 13 feet | 22 feet |
| 60 | 18 feet | 22 feet |
| 90 | 24 feet | 24 feet |
| | | |

(n) *Minimum throat dimension*. The minimum throat dimension of a parking lot entrance, measured from the right-of-way line to the first curb cut of the first parking aisle shall be thirty-six (36) feet as depicted in Figure 27-548-2. [See Figures at the end of article XIII.]

(Ord. No. 2004-10, § 1, 10-4-04; Ord. No. 2010-01, § 1, 3-1-10; Ord. No. 2010-14, § 54, 9-7-10)

Sec. 27-549. - Design standards for bicycle parking.

The spaces for bicycles shall:

(1) Be designed to allow each bicycle to be supported by its frame.

(2) Be designed to allow the frame and wheels of each bicycle to be secured against theft.

(3) Be designed to avoid damage to the bicycles.

(4) Be anchored to resist removal and solidly constructed to resist damage by rust, corrosion and vandalism.

(5) Accommodate a range of bicycle shapes and sizes and to facilitate easy locking without interfering with adjacent bicycles.

(6) Be located to prevent damage to bicycles by cars.

(7) Be consistent with the surroundings in color and design and be incorporated whenever possible into building or street furniture design.

(8) Be located in convenient, highly-visible, active, well-lighted areas.

(9) Be located so as not to interfere with pedestrian movements.

(10) Be located as near the principal entrance of the building as practicable.

(11) Provide safe access from the spaces to the right-of-way or bicycle lane.

(Ord. No. 2004-10, § 1, 10-4-04)

ADA Spaces

Sec. 27-543. - Parking requirements for handicapped persons.

Any parking area to be used by the general public shall provide suitable, marked parking spaces for handicapped persons. The number, design and location of these spaces shall be consistent with the requirements of F.S. §§ 316.1955 and 316.1956, or succeeding provisions. No parking space required for the handicapped shall be counted as a parking space in determining compliance with section 27-540, but optional spaces for the handicapped shall be counted. All spaces for the handicapped shall be paved.

(Ord. No. 2004-10, § 1, 10-4-04)

Parking (based on use and s.f.)

Office 1:400 s.f. Community center 1:250 s.f. of GFA or 1 per 3 seats, whichever is greater Storage: 1 per employee

Off Street Loading

5000-24999= 1 off-street loading space

Sec. 27-455. - Minimum landscape requirements.

(a)

Requirements of these sections do not exempt property owners from compliance with any other section of this article.

(b)

Minimum percentage of developed area devoted to landscaping. Property shall be designed, constructed and used so that the total of the areas devoted to landscape materials of any site is at least twenty (20) percent of the gross area of each parcel.

(c)

For property within the central business district, all portions of a site that are not otherwise covered by structures or pavement shall be landscaped. Because the landscaped areas are minimal within the CBD, the use of more dense plant materials is required. Landscape materials for sites within the CBD shall include trees, shrubs, vines and groundcovers. Therefore, sod shall not be used as a landscape material in the CBD.

(d)

Landscape and/or planting plans for all nonresidential developments shall be prepared by a landscape architect registered in the State of Florida.

(e)

Minimum requirements for landscaped areas. All development except individual, single-family and duplex residential lots shall meet the requirements of these sections. See <u>section 27-458</u> for specific requirements for individual, single-family and duplex residential lots. However, all other development shall comply with the following:

(1)

An automatic irrigation system shall be supplied for all newly landscaped areas. System shall include a pressure vacuum breaker-type backflow preventer, rain sensor, electric timer and valves, and sprinkler heads, and all pipe and materials necessary for a fully functioning system. The design of the irrigation system shall promote water conservation through methods such as efficient zoning of heads and/or micro-irrigation. The irrigation system shall be designed and located to minimize the watering of impervious surfaces. Irrigation shall not be required for existing natural vegetation areas. (2)

Plants shall be sized such that, within three (3) years of the time of planting, at least half of the required landscaped development shall be devoted to living plants. Remaining landscape areas shall be mulched with organic materials.

(3)

When a landscaped area is adjacent to or within a vehicular use area, curbing shall be used to protect landscaped areas from encroachment. Parking spaces shall be designed to provide pervious surface for the vehicle overhang area.

(4)

Shrubs and trees shall be placed away from the wheel stop, so that they will not be encroached upon by vehicles. In lieu of curbing, the alternative means of preventing encroachment shall be shown on the site plan.

(5)

All required trees shall be selected from the shade tree section of the city tree list in <u>section 27-450</u>. In order to encourage plant diversity, no more than fifty (50) percent of the selected trees for one (1) plan shall be from the same genus.

(6)

Any landscaped area adjacent to an intersection or driveway shall conform to the requirements for the vision triangle, as defined in article I.

(f)

Ocean-front lots. Oceanfront lots of any type shall be landscaped with salt-tolerant plant material only. (g)

Exemptions.

(1)

All parking garages shall be exempt from this section, pertaining to landscaping requirements for vehicular use areas; however, vehicles shall be screened from adjacent properties and public rights-of-way through the use of opaque materials at ground level.

(2)

Parking lots under lease. The area of any lot under lease which contains required parking spaces for any use shall comply with the provisions of this section as a precondition to the issuance of any development order issued in connection with such lot for such use.

(h)

Minimum submittal criteria.

(1)

All planting plans shall be drawn to scale and have a north arrow, and shall accurately depict all buildings, pavement, on-site facilities, utilities and lighting systems. The landscape drawing or accompanying development plan must give the permitted use of adjacent parcels and the total square footage of all pavement on-site.

(2)

A plant schedule shall be provided showing the botanical name, size, spacing and number of all required plant materials. During construction, any tree or shrub may be substituted for the identified plant, provided that the shrub is adaptable to the amount of sun/shade, wet/dry and size conditions where it will be planted, and insofar as the provisions for diversity described in this article are met. The use of additional plant material beyond the minimum required is strongly encouraged. However, plant materials shown that are additional to the required materials shall not be subject to inspection, and should be identified on the planting plans as "supplementary."

(i)

Design principles and standards. All landscaped areas required by this article shall conform to the following general guidelines:

(1)

The preservation of native trees and shrubs is strongly encouraged to maintain healthy, varied and energy-efficient vegetation throughout the city, and to maintain habitat for native wildlife species. (2)

The planting plans should integrate the elements of the proposed development with existing topography, hydrology and soils in order to prevent adverse impacts such as sedimentation of surface waters, erosion and dust.

(3)

The functional elements of the development plan, particularly the drainage systems and internal circulation systems for vehicles and pedestrians, should be integrated into the planting plan. The landscaped areas should be integrated, to promote the continuity of on-site and off-site open space and greenway systems, and to enhance environmental features.

(4)

The selection and placement of landscaping materials should maximize the conservation of energy through shading of buildings, streets, pedestrian ways, bikeways and parking areas. The use of wind for ventilation and the effect on existing or future solar access shall be considered.

(5)

Landscaping design should consider the aesthetic and functional aspects of vegetation, both when initially installed and when the vegetation has reached maturity. Newly installed plants should be placed at intervals appropriate to the size of the plant at maturity, and the design should use short-term and long-term elements to satisfy the general design principles of this section over time.

(6)

The natural and visual environment should be enhanced through the use of materials which achieve a variety with respect to seasonal changes, species of living material selected, textures, colors and size at maturity.

(7)

The placement of trees around buildings should permit access to the building by emergency vehicles. (j)

The installation of invasive nonnative category 1 species as defined by the Florida Department of Agriculture and Consumer Services (FDACS) and Florida Exotic Pest Plan Council (FLEPPC) is prohibited. (Ord. No. 2004-10, § 1, 10-4-04; Ord. No. 2006-02, § 6, 3-6-06; Ord. No. 2011-19, § 1, 10-10-11)

• Sec. 27-456. - Credit for existing vegetation.

(a)

Existing vegetation may be credited for landscape materials required by this section. Such vegetation shall meet the minimum specifications for new landscape material and be located within the area for which credit is requested. Credit for trees shall only be granted when trees would have been required within a twenty-foot radius of any existing shade tree or understory tree, excluding planting requirements for vehicular use areas. No credit shall be granted where existing vegetation does not satisfy screening purposes, serve necessary functions or meet minimum planting standards, as defined in this Code.

(b)

The city may grant additional credit for existing trees which are defined as heritage or champion trees in this Code. Such credit shall generally be given against requirements for additional landscape material within the general vicinity (i.e., parking island) of the specimen tree. This provision shall be reviewed on a case-by-case basis depending on surrounding existing vegetation, and the age, health, type, size and location of the specimen tree. Where credit has been given, the developer or property owner shall note on the landscape plan the landscape materials which would have been required if the tree did not exist. If the tree dies, the developer or property owner shall be required to install the materials described in the note.

(Ord. No. 2004-10, § 1, 10-4-04)

• Sec. 27-457. - Landscaping requirements for vehicular use areas.

(a) *Generally*. This section provides two (2) landscaping methods which are intended to set minimum requirements for the landscaping of vehicular use areas. Method 1 addresses shading by specifying landscape placement throughout and around the vehicular use area. These requirements are illustrated in 27-457-1. Method 2 provides flexibility in the design of vehicular use area landscaping in order to accommodate unique site considerations.

(b) Method 1 prescriptive landscape requirement.

(1) Perimeter requirements.

a. All vehicular use areas shall be separated by a perimeter landscaped area, a minimum of nine (9) feet in width, from any public right-of-way and from any boundary of the property on which the vehicular use area is located.

b. Exceptions. This landscape area is not required:

1. When the paved ground surface area is completely screened from adjacent properties or public rights-of-way by intervening buildings or structures;

2. When an agreement to operate abutting properties as essentially one (1) contiguous parking facility is in force. The agreement shall be executed by the owners of the abutting properties, and shall bind their successors, heirs and assigns. Prior to the issuance of any building permit for any site having such a contiguous parking facility, the agreement shall be recorded in the public records of the county;

3. When the paved area is at least one hundred fifty (150) feet from the nearest property line; or

4. When the required landscape strip would be in conflict with utility installations, and such conflicts cannot be resolved, such areas may be reduced to five (5) feet and planted with shrubs and such understory trees as may be acceptable to the utility;

5. For property within the city's central business district (CBD).

c. *Location of perimeter landscape area.* The landscape area shall commence within five (5) feet of the paved surface area, except that when a grass parking area is provided the landscaped strip may be located around such area. Where the perimeter landscape area and a required buffer overlap, the more stringent requirements shall be applied.

d. *Modification of requirements.* The community development board or staff, when only staff review is required, may determine that:

1. Screening is better achieved by relocation of the landscape strip;

2. There is an unresolvable conflict between other element(s) of the development plan and the location, width or height of the perimeter landscape area, and that the public interest is therefore best served by relocation of the landscape area, lowering the height of required material or the substitution of a solid fence or wall in conjunction with a reduction in width; or

3. That the screening would only serve to emphasize a long driveway that would otherwise be unobtrusive.

e. Required plant material. The perimeter landscape area shall contain:

1. Shrubs, arranged to provide a visual screen of seventy-five (75) percent opacity and achieve a height of at least three (3) feet within three (3) years; and

2. At least one (1) shade tree planted for each fifty (50) linear feet, or part thereof, of the boundary of the vehicular use area. The distance between such trees shall not exceed fifty-five (55) feet.

f. The community development board, during development plan review, may determine that natural vegetation is sufficient to screen adjacent properties and rights-of-way. In such instance the existing vegetation, including understory plants and bushes, is protected from pruning and removal, except that diseased plant material and invasive nonnative species may be replaced in accordance with this section. Where encroachments are made for utility connections, replacement plants appropriate to the ecosystem shall be required.

(2) Interior requirements.

a. Interior areas required to be landscaped include terminal parking islands, interior islands, divider medians, and islands at T-intersections.

b. The placement of landscaped areas throughout the interior of the paved area shall average one (1) interior landscaped island for each ten (10) parking spaces, with a terminal island at each end of five (5) or more contiguous parking spaces. At no time shall a row of parking have landscape areas greater than one hundred thirty-five (135) feet apart or closer than thirty-five (35) feet. Standards for minimum landscape islands are included in article IV.

c. Minimum planting requirements: (See Figures 27-457-2 through 27-457-4 at the end of article IX.) 1. *Terminal islands:* One (1) shade tree per three hundred (300) square feet of interior landscape area, minimum one (1) shade tree per terminal island area. Shrubs or groundcovers shall be planted to cover thirty-five (35) percent of terminal islands, with a two-foot strip of mulch or sod adjacent to parking spaces, and a three-foot strip of mulch or sod adjacent to access drives.

2. *Interior islands:* One (1) shade tree per three hundred (300) square feet of interior landscape area, minimum one (1) shade tree per interior island area.

3. *Divider medians:* One (1) shade tree per thirty (30) linear feet of divider median, or fraction thereof. A continuous shrub hedge shall be planted in all divider medians that separate parking from access drives.

11

d. The community development board, or city council and city manager or designee, through development plan review, may allow the relocation of such landscape areas to preserve existing trees, or where it is determined, upon review and recommendation of the city manager's designee, that the relocation is necessary for the safe maneuvering of vehicles or pedestrians.

(c) Method 2 performance landscape requirements.

(1) Method 2 requires that at least fifty (50) percent of the vehicular use area be shaded. Alternative landscaping objectives are provided that can reduce the required amount of tree shade that must be provided in the vehicular use area. Method 2 is encouraged in the following circumstances:

a. The site contains unique geologic features or a tree grouping which may be adversely impacted if the requirements of Method 1 are adhered to;

b. The preservation and enhancement of cultural, architectural or historical elements on the site would be better achieved by Method 2; or the design proposes a unique design element that serves as a focal point, a site unifier, or as an element which articulates a specific portion of the development and cannot effectively be integrated into the overall design through the use of Method 1; or the design of on-site stormwater facilities requires greater flexibility in the arrangement of landscaped areas.
(2) Method 2 requirements.

a. The vehicular use area shall be planted with trees sufficient to shade fifty (50) percent of the total vehicular use area. Tree types shall not be substituted except as would maintain the required shading. Shrubs, groundcover and trees shall be chosen and arranged to conform with the guidelines of <u>section</u> <u>27-455</u>.

b. All landscape plans shall be accompanied with calculations and shadow studies in order to evidence fifty (50) percent coverage of the interior of the vehicular use area, or meet alternative landscaping requirements as detailed later in this section. In determining the area shaded, the following methodology shall be used:

1. Calculate the proposed shading of pavement assuming that the shaded area is only that area directly under the tree canopy or drip line. The estimated crown for a twenty-year-old shade tree shall be used to calculate the percent of shaded area.

2. Landscaped areas within the vehicular use area containing trees shall be counted in the calculation of shaded area.

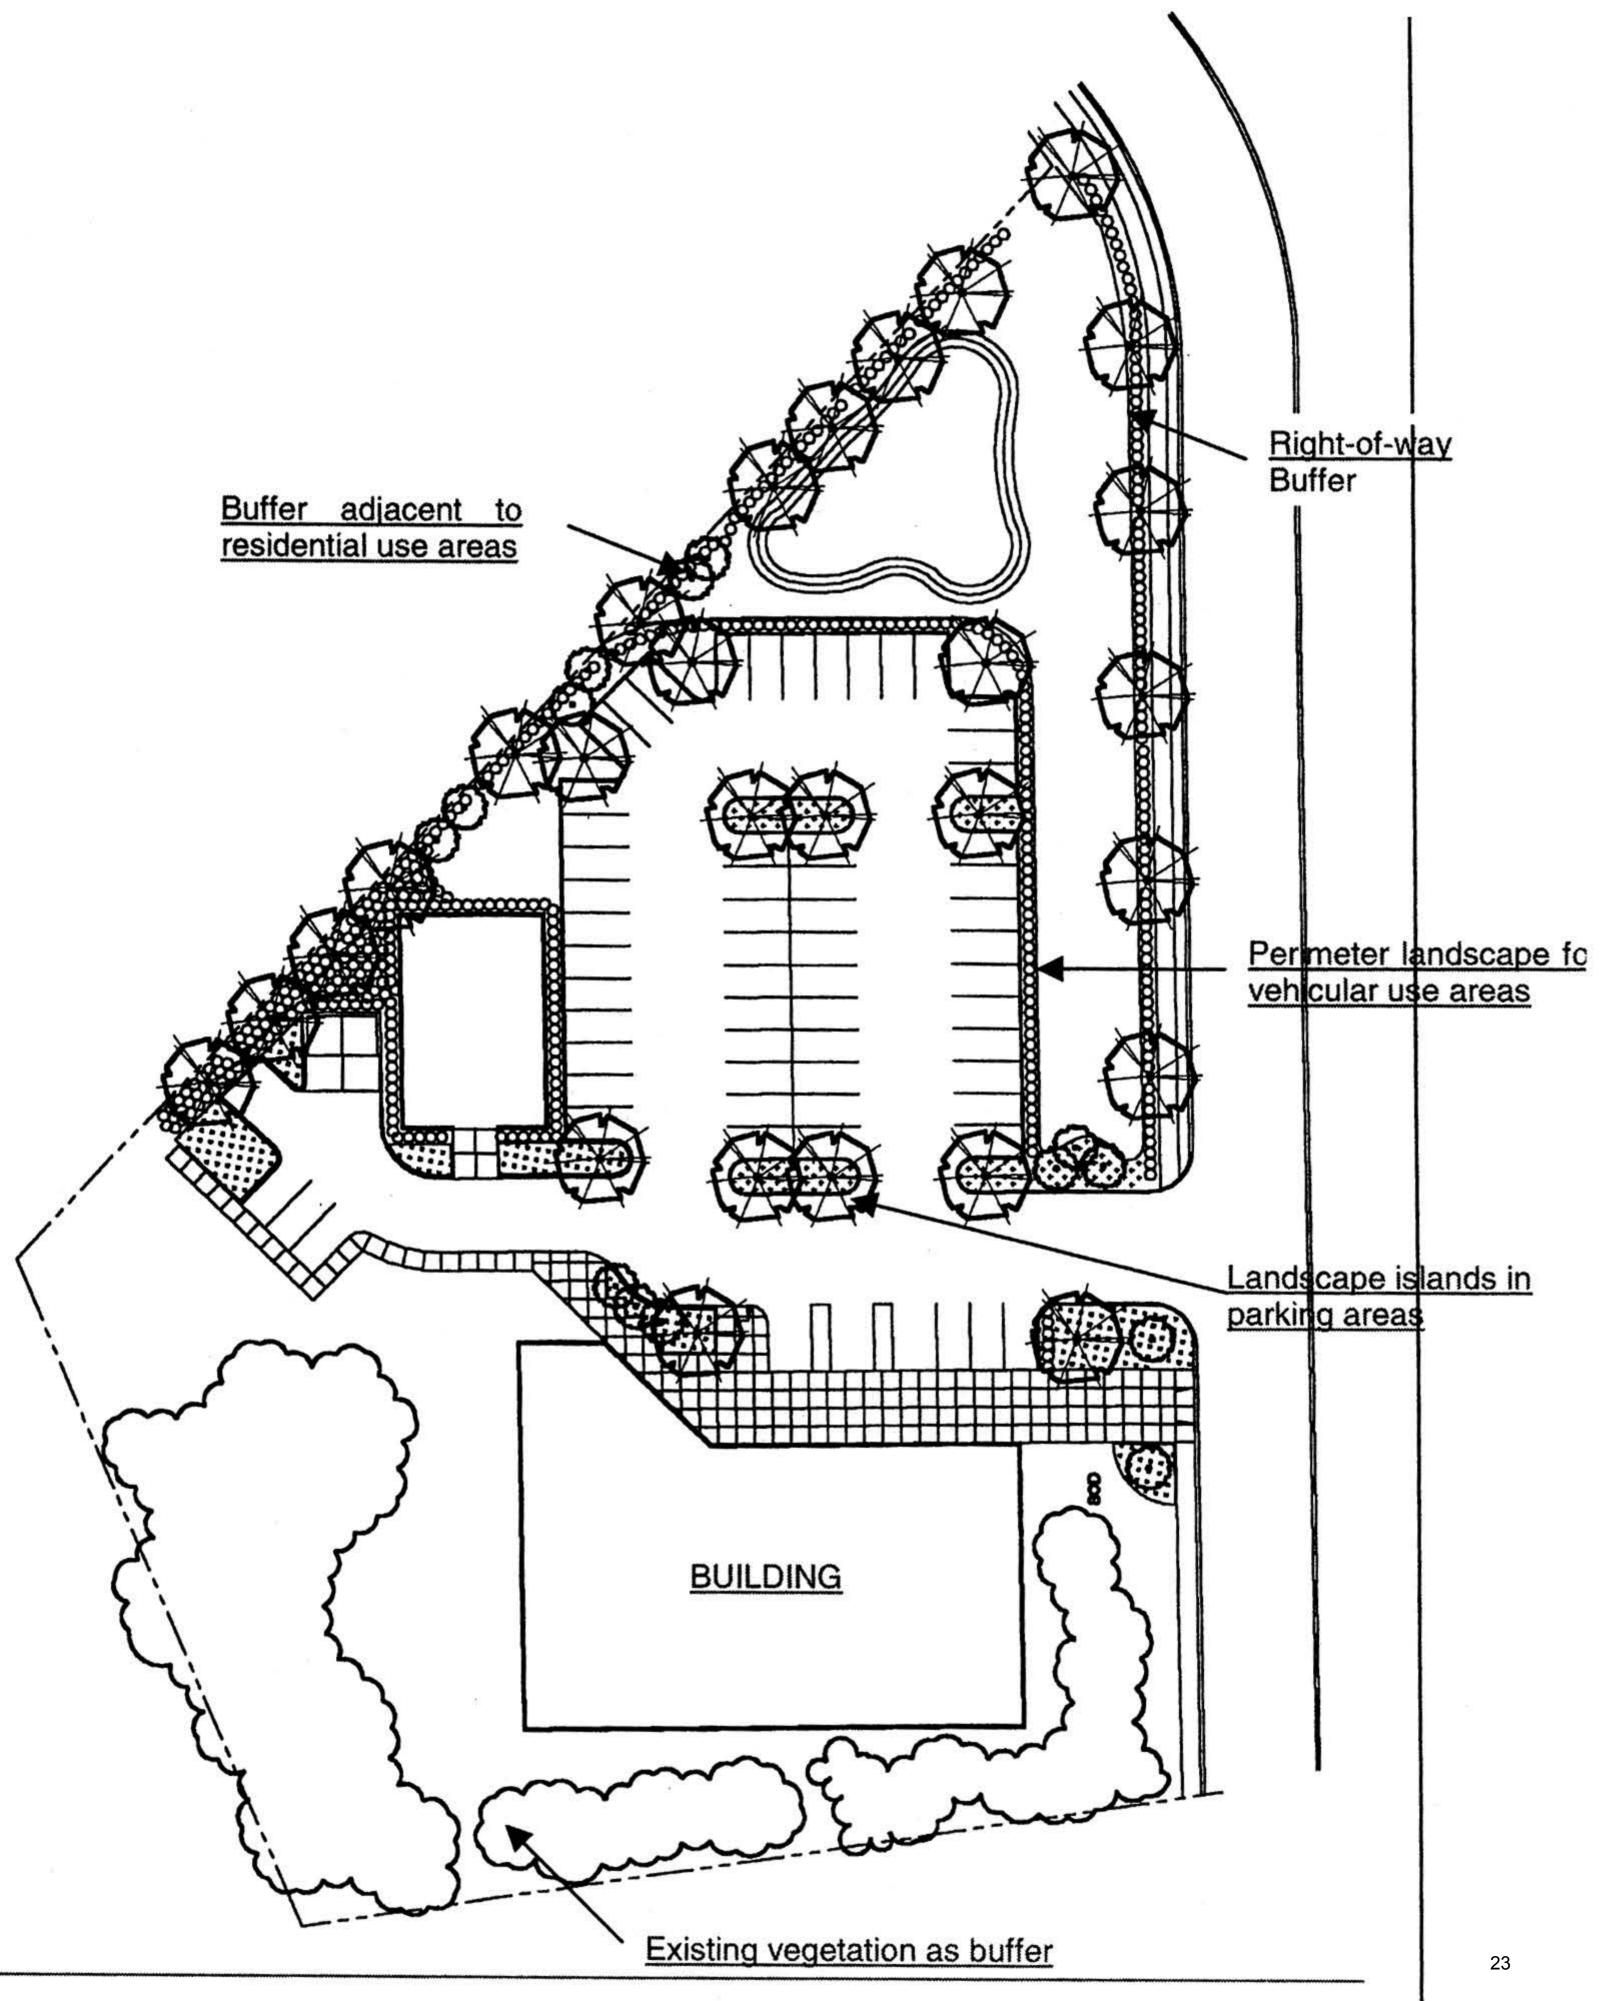

3. Paved areas under structures (such as second stories of buildings, canopies, etc.) may be deducted from the total paved area to be shaded.

c. When shade trees are planted on the perimeter of a parking area, they must be planted no closer than four (4) feet and no farther than nine (9) feet from the edge of the pavement, and must provide shade to either the parking area, the primary structure or an adjacent pedestrian area. If an existing tree is used to fulfill shading requirements, it should be in the vehicular use area, or within nine (9) feet of the vehicular use area; however, a tree located further from the vehicular use area may be counted towards the fulfillment of the shading requirements, provided city staff finds that the tree casts shading equal to the minimum canopy of any parking lot tree on the city shade tree list, onto the vehicular use or pedestrian areas.

d. When any portion of a vehicular use area is not screened by buildings or required street buffer and is within fifty (50) feet of a property line or a public right-of-way, a perimeter landscaped area or vegetated berm shall be provided so as to effectively screen any adjacent property or right-of-way. e. Exception to the fifty (50) percent shading requirement. When Method 2 for minimum landscape requirements is used, a reduction to thirty (30) percent shading of the vehicular use area may be allowed two (2) or more of the following conditions are present on a site:

1. Vehicular use area located on the north side of a structure, on the same lot, and receives fifty (50) percent shading in the afternoon by the structure.

Existing tree groupings are to be preserved, in an amount of at least one thousand (1,000) square feet or twenty-five (25) percent of the square footage of the groupings, whichever is greater.
 Preservation of existing wetlands that are not otherwise protected from encroachment by federal, state, regional or local regulations. A transitional buffer, having a minimum width of fifteen (15) feet, shall be provided. The total area so preserved shall have a minimum size of one thousand (1,000) square feet. The petitioner shall present competent evidence that such area is a viable wetland. (Ord. No. 2004-10, § 1, 10-4-04; Ord. No. 2010-14, § 45, 9-7-10)

Lauren-You are welcome.

The site plan is the one Piper and I provided last week. When speaking to the Vanguard rep and asked if the building would sit facing east, he never hesitated with the answer of "yes." With his experience, I believed him. The engineer we had as a contract employee never indicated that the orientation of the building facing east would be a problem.

The funding donating during the campaign was to augment the \$400,000 allocated from gas tax monies by the council. There was never a point of discussion that I was privy to that the donated monies specifically for "Rebuilding Our Senior Activity Center would "reimburse" the gas tax money earmarked by the City Council. The donated monies will be used in the cost of rebuilding and amenities inside the center that are very needed. (I have attached a proposed estimate of the furnishings needed for the new building.)

With kind regards,

Leslie Lyne

Thank you for your response Leslie. Is it safe to assume that a site plan (not a floor plan) of 2004 Forest Ave was not done prior to the finalization of the building design? Also, how will the funds raised for the SAC be allocated? Is it still the plan to replenish \$100k of the half cent gas tax account?

Regards,

Lauren Key

Subject: Re: Senior Center

Since Monday, I have emailed these questions below and my email requests for answers to these questions have been read and ignored. Not only is this disrespectful to me as a Council Member to ignore my requests for information, it is insubordinate. I have questions regarding the changing of the orientation of the building and I expect these questions to be answered.

Just with any business, there are layers of accountability and I am simply asking for transparency which seems to continuously be denied to me and I find that unacceptable, especially in government. I expect answers from you, as staff, just as the citizens expect answers from me. Please have the questions below answered by close of business tomorrow, Friday, February 11.

- Does anyone have anything in writing from Vanguard stating that we have to change the orientation of the building? (other than your communication attached here confirming that you went out and measured the site on 11/23/2020)
- How and why did they decide to change the orientation?
- Based on what evidence?
- Basically, what was their justification for this?
- The geotechnical survey that is attached here is dated 1/21/2021 and shows the building in the proper and proposed orientation of facing Strickland yet the decision to change it was made in November. Where is the disconnect? I am trying to get a clearer picture of what has happened here.

In addition to these questions, it has now been brought to my attention that the property has freshly cut oaks trees. Was there was a tree plan/survey prior to the delivery of the building? Was permission given by an arborist to cut these trees? It is my understanding the arborist said not to

touch the trees, yet they are freshly cut. Please advise on this matter as well.

Thank you for your cooperation.

Leslie,

Just a reminder that I still have not received a response to questions posed regarding the changing of the orientation of the senior center referenced in Monday's email. I understand that you all may need more time in response to my more technical questions about budget, etc. However, an update and/or acknowledgement of receipt and that you are gathering the info would certainly be appreciated. Thank you.

Does anyone have anything in writing from Vanguard stating that we have to change the orientation of the building other than your communication from 11/23/2020 that was provided to me today. How and why did they decide to change the orientation? Based on what evidence? Basically, what was their justification for this? The geotechnical survey that is attached here is dated 1/21/2021 and shows the building in the proper and proposed orientation of facing Strickland. Where is the disconnect? I am trying to get a clearer picture of what has happened here.

Leslie – I got your message. Does anyone have anything in writing from Vanguard stating that we have to change the orientation of the building other than your communication from 11/23/2020 that was provided to me today. How and why did they decide to change the orientation? Based on what evidence? Basically, what was their justification for this? The geotechnical survey that is attached here is dated 1/21/2021 and shows the building in the proper and proposed orientation of facing Strickland. Where is the disconnect? I am trying to get a clearer picture of what has happened here.

Please provide me with the estimated costs for this project that include:

- Plumping
- Electrical
- Landscape
- Parking and sidewalks
- Porch

What items are outstanding for this to go from as it currently sits now to complete? What is that estimated timeline?

From: <u>Lauren Key</u> Sent: Friday, February 5, 2021 12:59 PM To: <u>Leslie Lyne</u>; <u>Stefen Wynn</u> Subject: Senior Center

Hello Leslie and Stefen,

As you likely know by now, I have been contacted a few times over the last few days regarding the Senior Center. I drove by the senior center to see the concerns for myself and I can see why there is concern.

As I was trying to catch up on the whole senior center process, I watched meetings in which a site plan and landscape design were mentioned. Please send me those documents as well as the actual project site elevation renderings. I think it might help the neighborhood/community to also provide them with the color renderings for the site with the proposed landscaping - maybe even have a large sign printed and posted at the site to show people what is to come as is common with many new commercial sites. I can understand how it is hard for many to imagine how it will look when finished. I think this small effort in showing them what will actually be there will be helpful since as it stands the manufacturers rendering is not an accurate depiction as it doesn't show the ac units on the side and less windows.

Is there a plan to cover all the AC units on the east side? I'm assuming this is addressed and shown in the site renderings. Thank you

Regards,

Lauren Key Councilor

RE: FY 2021 Budget – 2nd Revision

Sir,

After an in-depth review of the agency's essential requirements, the budget needs for fiscal year 2021 are listed below. Each item aligns within the S.M.A.R.T. model requested by the City Manager. While these items have not been necessarily prioritized from most-to-least, critical items have been flagged appropriately.

| 3 Police Vehicles – Critical |
|---|
| Problem & Scope: |
| A current assessment has identified the need to purchase three new police vehicles |
| to keep up with our aging fleet. Aging fleets are both a risk to public safety and a cost |
| liability. Repairs leave police vehicles down for extended periods of time and are often |
| extremely expensive, especially without a City Mechanic which forces the agency to |
| outsource repairs. Vehicles and equipment purchases will be made through |
| government contracts and approved vendors |
| Budget Narrative: |
| Projected Florida Sheriff's Association Contract cost for Chevrolet Tahoe 4WD PPV: |
| \$37,000. |
| Upfitting Emergency Equipment Costs: \$14,500 |
| Graphics: \$550 |
| Police Radio: 3,800 |
| Total per unit: \$55,850 |
| Note; Due to lack of spare vehicles, no older patrol vehicles are projected to rotate |
| out-of-service this upcoming budget year. |
| <u>Total:</u> \$167,550.00 |

Chief of Police Richard J. Pike

200 LEMON STREET ☆ NEPTUNE BEACH, FLORIDA 32266 ☆ 904 270 2413

Radio Refresh – Critical

Problem & Scope:

The NBPD utilizes a Motorola 800mhz radio system, which is shared by the entire county. This system, officially named the 'First Coast Radio System', has been in existence since 2002. Therefore, the vast majority of the NBPD's radios currently being used are 18 years old. Motorola has recently ended service and repair on these models.

By using grants, the NBPD has slowly been replacing these units with newer models, however an assessment has identified the need for 29 radios, which far exceeds that which is able to be obtained via the extended 'trickle-in' type replacement model. Each Officer requires two radios; one inside his/her vehicle and one portable belt-mounted radio.

Budget Narrative:

Projected NASPO Contract cost for 37 Police Radios - 29 Portables, 8 Mobile ~\$4,000ea Total:

\$152,000.00. (Financing= 2, 3 or 5-year terms, 76k, 52k or 32k per year, see attachment for APR%)

Computer Aided Dispatch Project – CAD (continuation) – Critical

Problem & Scope:

The NBPD began a project in FY2020 to begin integration with the county-wide computer aided dispatch (CAD) system. This system allows our agency to immediately share call information with other responding agencies.

Budget Narrative:

Projected costs over 4 years are \$80,000 for full implantation. Costs have been broken into smaller increments of \$20,000 per year.

<u>Total:</u>

\$20,000

TASER Refresh (continuation) – Critical

Problem & Scope:

The NBPD identified the need for a complete refresh of its TASER inventory in FY2019. This funding is a continuation of that project.

Budget Narrative:

TASER 7 refresh was broken-down into 5 payments for 5 years of \$13,400 per year. <u>Total:</u> \$13,400.00

200 LEMON STREET ☆ NEPTUNE BEACH, FLORIDA 32266 ☆ 904 270 2413

NBPD HQ Generator – Critical

Problem & Scope:

During a routine inspection of the department's emergency back-up generator in FY2020, the double-wall fuel tank was found to be defective. Water intrusion from rain runoff has been leaking into the double wall void. This has the high potential to then leak into the diesel fuel chamber causing the generator to fail when needed. The operational reliability of this unit is paramount for hurricane preparedness. In FY2020, an external spare tank was purchased to ensure temporary operation as hurricane season approached. This is not a long-term solution and the tank is not secure or in compliance with Accreditation standards.

Budget Narrative:

1. A new tank to replace the failing one would require a crane to lift the generator off the fuel tank that it sits on. The cost of this process is roughly \$20,000.

2. A new generator is roughly \$44,000.

3. A new generator large enough to power both Police Headquarters and City Hall is roughly \$86,000.

<u>Total:</u>

\$86,000 (to be shared with City Hall)

Building Maintenance – Paint

Problem & Scope:

The exterior of Police HQ is in need of general maintenance.

Budget Narrative:

Paint and replace rotten wood on the exterior of HQ.

<u>Total:</u>

\$6,000.00

HVAC for Training Room

Problem & Scope:

The current training room inside Police HQ was built as a remodel years ago. The HVAC system currently installed does not adequately cool the added space, nor has it ever. A window unit was purchased years ago, however even it fails to cool the space.

Budget Narrative:

Install larger unit or increase the size and duct work of the current system. **Total:** \$4,000.00

200 LEMON STREET ☆ NEPTUNE BEACH, FLORIDA 32266 ☆ 904 270 2413

Replacement 4x4 UTV (Mule) – GRANT POTENTIAL

Problem & Scope:

The current UTV vehicle utilized to access the beach is nearing its end-of-life. The vehicle's frame is rusting, and repair costs are becoming cost-prohibitive to maintain the vehicle in the fleet. The UTV is utilized routinely, especially during times that the beaches crowds are excessive and safe operation of a full-sized vehicle is unsafe. The Firehouse Public Safety Grant Foundation and Homeland Security both have grants available for funding sources. Deadlines are rapidly approaching (mid-June 2020)

Budget Narrative:

Projected costs for a new UTV: \$15,000.

Upfitting of emergency equipment: \$2,000.

<u>Total:</u>

\$17,000

Forecasted Increases in Salaries ('Career Tracks' Program) – CONTRACT <u>Problem & Scope:</u>

If member's elect to participate, a potential increase through the 'Career Tracks' program will increase the salary line item in budget.

Budget Narrative:

Forecasted increase in salary budget

<u>Total:</u>

\$4,624 — (Camacho \$1,578, Carlson \$3,363, Dzamko \$3,771, Stucki \$3,415, Torres \$3,628 = \$15,755, Bounds -\$11,131 = \$4,624)

Purchase of Two Sign Boards and Water Barricades with Trailer

Problem & Scope:

The purchase of two electronic sign boards and water barricades will eliminate rental costs and increase public safety and education. Sign boards and water barricades will be utilized during special events, natural disasters and road work, to name a few. The rentals costs have now surpassed the amount required to simply purchase the items on our own. Further, costs could be shared with Public Works, as many uses are applicable to road work and warning messages concerning public works projects.

Budget Narrative:

The purchase of two fully equipped signed boards.

The purchase of water barricades and an open trailer to carry barricades.

<u>Total:</u>

\$42,000.00 (proposal to split costs with Public Works)

Chief of Police Richard J. Pike

★ EXCELLENCE

200 LEMON STREET ☆ NEPTUNE BEACH, FLORIDA 32266 ☆ 904 270 2413

Purchase of Two BWC & In-Car Cameras for DUI Unit

Problem & Scope:

The NBPD currently does not have an active Body Worn Camera (BWC) program. As these devices have become popular throughout law enforcement agencies, one major hurdle preventing our department from the deployment and usage of such device has been the significant investment for software storage and personnel for redaction. The initial stages for implementation are to purchase 4 devices, for each of the DUI Traffic Enforcement Officers to utilize prior to a full roll-out to the rest of the agency.

Budget Narrative:

Axon BWC and In-car Camera system per officer \$7,500.00

<u>Total:</u>

\$15,000.00

Firearms Range Upgrades

Problem & Scope:

The NBPD currently operates a Firearms Range within the City Yard facility. The range is used routinely for qualifications and testing during hiring of new officers. The range has not had any significant improvements made to it for nearly 10 years. The wood wall surrounding the target system needs to be replaced, the pneumatic actioning target system has been non-functional for nearly 8 years and the shade canopy is nearing its end-of-life. Improvements will include replacement and/or repair of existing equipment.

Budget Narrative:

Projected costs to repair pneumatic airlines and broken wood wall: \$1,500. Total:

\$1,500.00

Glock Duty Weapon 9mm Transition Project

Problem & Scope:

This project will allow NBPD to transition from .40 cal to 9 mm for duty weapons. This aligns with other nearby agencies and numerous studies have found the 9mm platform to be superior for numerous reasons from better recoil control to more cost effective when purchasing ammunition. Current weapon inventories can be traded-in for a credit when purchasing new firearms, thus having significant cost savings when refreshing the weapon inventory. Issued duty weapons exceed 15 years of age.

Budget Narrative:

Costs will be nominal due to trade-in credits. Projected cost are \$100 per weapon. Total:

<u>\$1,800</u>

Chief of Police Richard J. Pike

200 LEMON STREET ☆ NEPTUNE BEACH, FLORIDA 32266 ☆ 904 270 2413

Bicycle Repair Station – GRANT POTENTIAL

Problem & Scope:

Neptune Beach is heavily traveled by bicyclist, who often time break down and seek police assistance. A bicycle repair station, to be installed in the front porch area of Police HQ, would alleviate this issue. This system will allow any member of the public the ability to repair their bicycles 'on the fly' and in a safe environment.

Budget Narrative:

Purchase and installation costs.

<u>Total:</u>

\$1200.00.

Patrol Rifle Refresh – 4 Rifles Per Year

Problem & Scope:

The NBPD's current weapons inventory includes patrol rifles (AR-15 .223 Cal) in excess of 15 years of age. While these weapons are inspected by agency armorers each year, the rifles have surpassed the life expectancy for safe patrol usage. A complete refresh of patrol rifles is needed over the course of 4 years.

Budget Narrative:

AR-15 Carbine Variant: \$750.00 Optic and associated equipment: \$400.00 Total per unit: \$1150.00

Total:

\$4,600.00

Sincerely,

COMMANDER MICHAEL KEY

MOBILITY MANAGEMENT

City of Neptune Beach Mobility Department North Beaches Parking 904.566.9410 parking@nbfl.us

FY 2021 BUDGET UPDATE

February 18, 2021

Overview:

To the best of my knowledge and understanding, the Mobility Department is on track with our projected budget for 2021. Parking program revenue has been consistent each month. Some minor budget adjustments will be needed for several unforeseen repairs and the hire of a new parking ambassador to fully staff the program, and I am keeping the CFO apprised of these changes. Overall, the parking program continues to generate a positive net income.

Capital Improvements:

- <u>\$3,501.00 outstanding to Donovan Heating and A/C</u>: This invoice addresses parts and installation of a mini-split HVAC unit for the parking office. The constant temperature fluctuations and resulting humidity in the parking office cause mold risks and are not conducive to storing parking machine electrical and computer parts. The new system will also be more energy efficient to run than the existing, temporary floor unit.
- Approximately \$1,000 outstanding to Limbaugh Electrical (have not received invoice yet): Cost of running new electrical circuit from the main board in the Police Department building to the parking office for the new HVAC unit.

Regards,

Megan Steward Mobility Management Director City of Neptune Beach
